

The GED & Me Mobile App

TIPS FOR EDUCATORS

As an adult educator, you understand that preparing for the GED® test can be a challenging journey for many learners. The GED & Me™ mobile app, created by the makers of the GED test, is designed to simplify this process, offering learners an engaging, personalized, and accessible way to stay on track with their studies — anytime, anywhere.

What is the GED & Me app?

The GED & Me app helps independent learners prepare for the GED® faster, by helping them to build confidence and maintain motivation through guidance and encouragement. It combines study tools, progress tracking and custom notifications to support learners throughout their test prep journey.

→ Personalized study plans

Learners can create customized study plans based on their goals and available time. The app tracks study hours and helps build healthy study habits.

→ Custom reminders

The app sends timely notifications to help students progress, whether it's a nudge to complete a practice test, schedule an exam, or stay focused on their goals.

→ Practice questions

Learners can keep knowledge fresh in mind and reinforce key concepts with targeted practice questions designed to mirror the test.

→ Learner Like You

Students can engage with others through “Learner Like You” — a community for sharing stories and motivation along their journeys.

→ Integration with study materials

Learners can integrate their app with print materials, such as the Kaplan GED® Prep book, to bring digital and print learning together.

HOW TO USE THE APP IN YOUR CLASSROOM

Lesson planning

Use the app to connect textbook content with digital lessons, creating a well-rounded curriculum aligned with the actual GED test. This ensures your students are studying relevant material while staying on track with your lessons.

Class warm-ups

Use the app's Question of the Day as a fun and engaging way to kick off lessons, spark discussions, and test knowledge on key concepts.

Digital literacy

The app supports test preparation and helps meet the digital literacy requirements within adult education programs. By encouraging students to use the app, you are providing them with essential tech skills for success.

Bridging the gap

The app provides direct access to content and tools from GED Testing Service, which ensures that resources are reliable and up to date.

Learner connection

Use the "Learner Like You" stories to encourage learners to share their own stories with each other and make connections in the classroom.

On the go

Advise learners to use the app for practice when they have a few minutes — to and from class, on the bus, or during a break. Even small amounts of study time can be tracked and add up to real progress.
