

GED Direct – digital voucher assignment for GED Ready and GED tests for use in RegMan

In the March 2024 technology release, GED Testing Service made an update to GED Direct to allow digital vouchers to be assigned and viewed in the 'Assignments' section. This allows student scheduling via RegMan

This update is useful for public and private sites that are scheduling test-takers on the same day for testing

The digital voucher may also be used by Corrections test administrators who must schedule test-takers with a digital voucher via RegMan

GED Direct:

In the Assignments section on Student Detail, when you are ready to assign a digital voucher for a GED Ready or GED test you will see 'assign digital voucher' in the Status Field

Once you assign a GED test, the student will see the assignment card on their GED.com Activity page and can schedule their own test. The Voucher will be assigned, and the Status column will show as "Accessed"

If the student tries to schedule their own test, a voucher will be assigned.

After 24 hours of the student trying to schedule but not actually scheduling the Status will change to 'Not Started (unassign)' and you can then unassign the voucher if you choose.
