

# The Value of Mobile Testing Centers

Natalie E. Cummins, Pearson VUE Client Channel Operations Manager

#### **Your Presenter**

## **Natalie E. Cummins (she/her)**

- Pearson VUE Client Channel Operations Manager
- Former GED Administrator<sup>™</sup> for Kentucky
- 25+ years in Adult Education

## **Today's Learning Objectives**

- Understand the concept of Mobile Testing Sites
- Look at the reasons to do Mobile Testing
- Examine the current testing footprint in the US
- Discuss how to make this work in your state
- Review more details about Mobile Testing

## What is a Mobile Testing Center?

A mobile testing center is a set of **testing computers** and other necessary equipment that can be deployed in a **remote location** to do GED® testing.

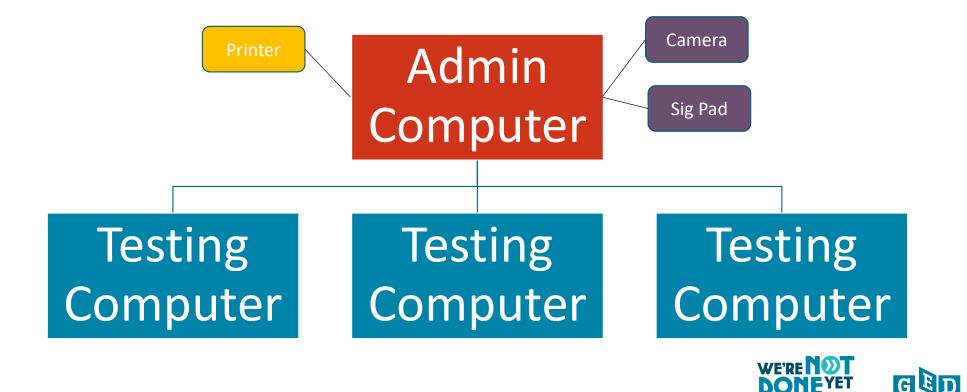

Mobile testing centers are <u>usually</u> created as "**satellites**" of existing fixed testing centers. **Freestanding mobile sites** may be approved <u>at the discretion of GED Testing Service.</u>

Mobile testing is most commonly used to serve jails, but it can be very valuable for public testing needs.

## **General Testing Setup (SAMPLE)**

## What makes Mobile Testing a good idea?

- A mobile site allows you to take testing to your students
- It offers the same test security as a fixed Pearson VUE Testing Center, because it is a PVTC
- Your test proctor can be the same proctor as for a fixed site

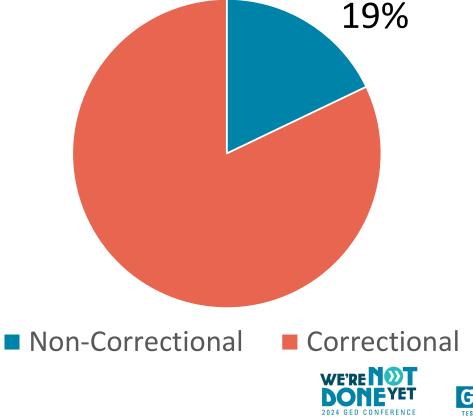

## **Mobile Testing Center Statistics**

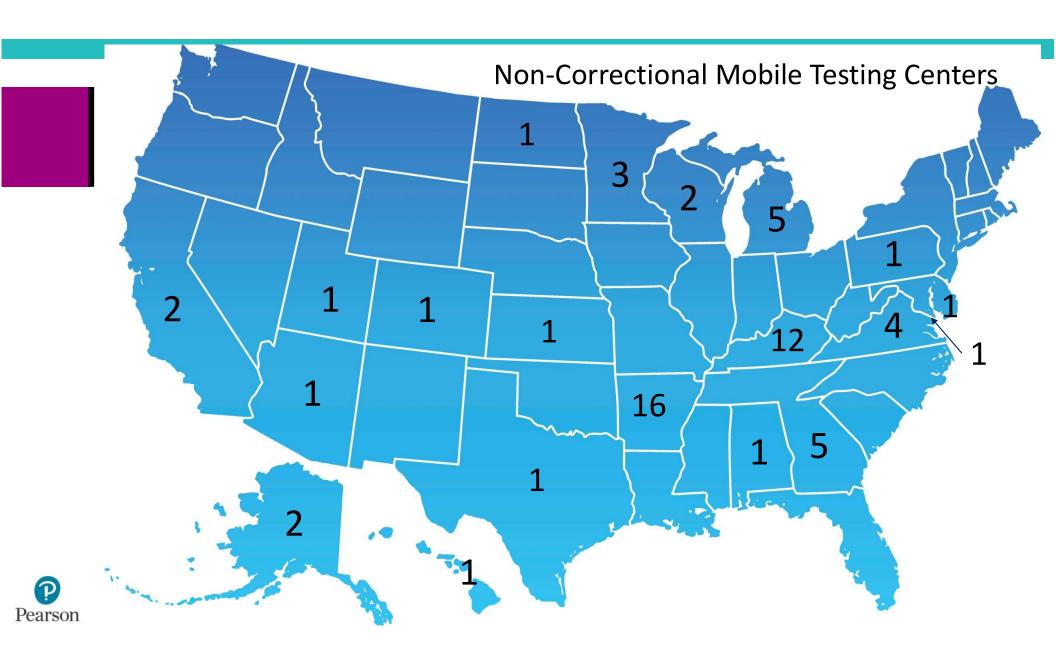

313 Mobile Testing Centers in the US (as of June 2024)

- 254 Correctional
- 59 Non-Correctional

## **Help Address Capacity Issues**

"Testing deserts" create more barriers for adult learners with transportation issues. Distance increases obstacles around:

- Cost
- Time
- Courage

#### **Benefits**

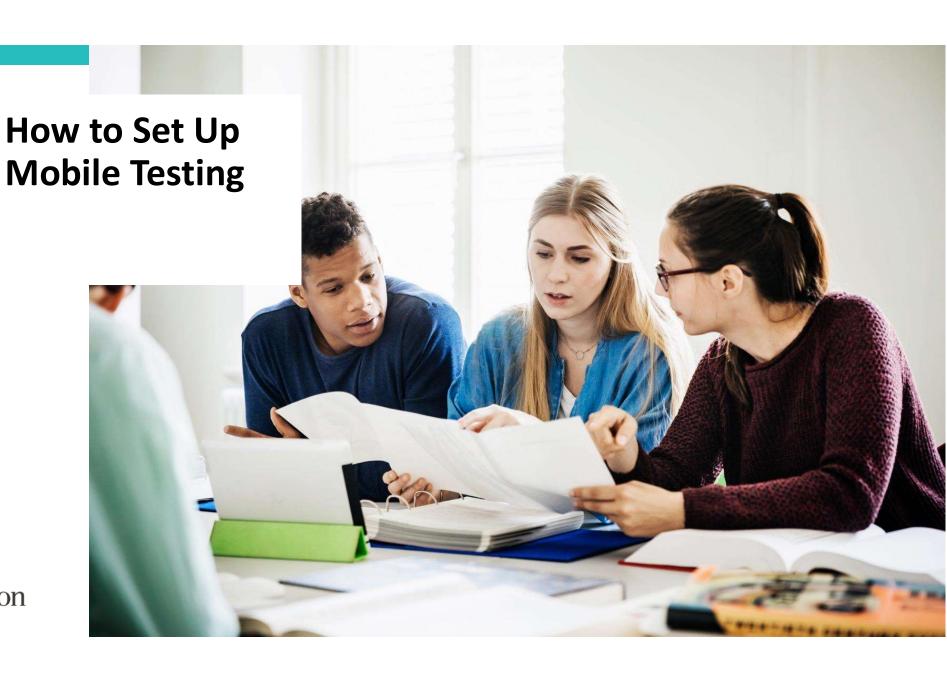

- Reduced travel costs for students
- Reduced wait time for testing
  - May increase pass percentage by reducing wait time
- Flexibility of testing schedule
- Tests may be delivered offline
- More reliable than Online Proctored (OP)

You can take testing to where your students are.

### **Before You Apply**

- Consider locations where testing is needed
- Identify libraries, schools, churches, businesses, etc. which have a space suitable to meet the security requirements of GED® Testing
- Determine how operating costs will be covered

#### **One-Time Costs**

- ESP Kit (digital cameras and digital signature pad)
- Portable storage (if no storage available on-site)
- Laptops
- Extra monitors, keyboards, mice

#### **Recurring Costs**

- Test Administrator salary
- Mileage for travel

Consider private funding sources and alternate grant opportunities to cover these costs.

#### **Application**

- Contact PV Channel Sales (through your SRM)
- Sign an Exhibit B as an addendum to your current site agreement (if adding to an existing test center; freestanding Mobile sites go through a deeper application)
- Complete a questionnaire
- Your fixed site needs to be in operation for 3 months prior to adding mobile testing (exceptions may be available)

#### Questionnaire

- Describe the following:
  - Reception and check-in area (check-in outside the testing area)
  - Personal item storage (locked and outside the testing area)
  - Test delivery area (distraction-free and with laptops 4 feet apart or separated by dividers)
  - Monitoring (proctor has a clear view of all test-takers at all times)

#### **Equipment**

- Laptops (testing and administrator); separate from any used in the fixed center
- Security kit (camera and signature pad)
- Peripherals (keyboards, mice, monitors)
- Storage for test-takers' personal items
- Storage/transportation for laptops and peripherals

Technical Requirements for Laptops in Mobile Test Centers (pearsonvue.com)

#### **Software**

- After the Site ID is assigned, you will receive a link to download and install software
- Be sure you have someone available who has local admin rights to your computers

## **Mobile Testing Implementation Flow**

Identify areas to conduct testing that will satisfy security needs.

Contact Pearson Sales to set up an application.

Sign and return the Exhibit B.

Procure equipment based on Pearson specs.

2

Install software to laptops.
Certify additional Test Administrators, if necessary.

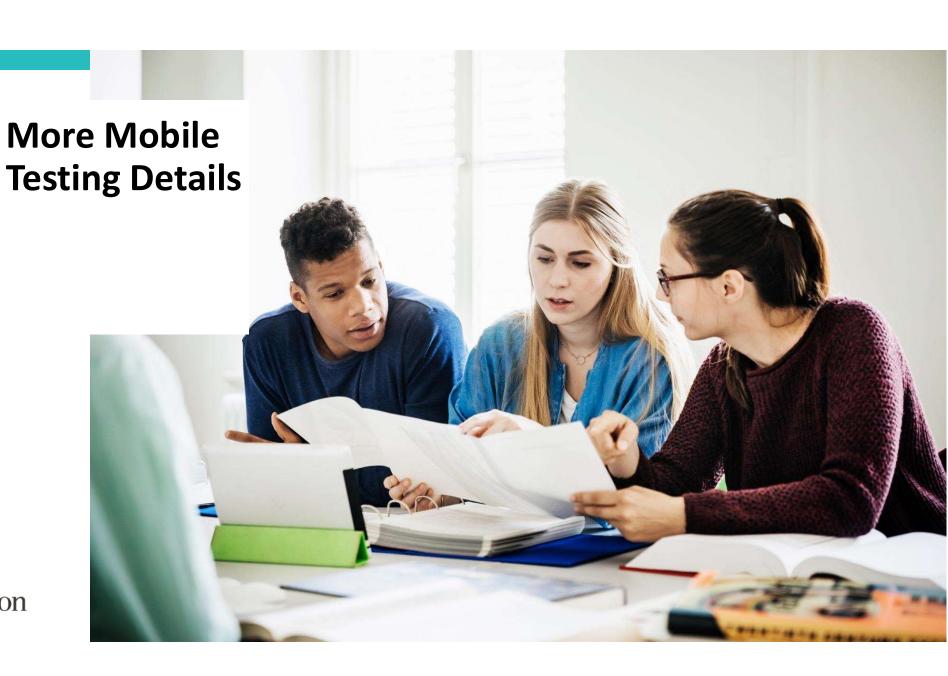

Begin Testing.

## **GED** test may be delivered offline

- Download tests to the Admin Computer where internet is available
- Connect Admin Computer to Testing Computers at the testing site
- Deliver the test
- Upload the scores when the Admin Computer is connected again to the internet (ideally within 24 hours)

## Minimum 1 testing computer (maximum 15)

- Mobile testing can be as simple or complex as you like!
- It can be customized to fit your budget.

## Set your own testing hours

- Mobile testing centers are Private by default
- Testing hours are not visible to test-takers in their GED accounts
- You can test with extreme flexibility and responsiveness

## Register test-takers directly in Registration Manager

- Mobile testing centers are Private, and test-takers cannot see these centers in their GED accounts
- The Test Administrator registers students directly for testing, and this can be done immediately before testing
